BODY CUPPING MASSAGE

RELAXATION WITH NEGATIVE PRESSURE

THE ONLY **NEGATIVITY** ACCEPTABLE IN LIFE

By creating suction and negative pressure, this therapy release rigid soft tissue, drains excess fluids and toxins loosens adhesion, lifts connective tissues, and brings blood flow to stagnant skin and muscles.

YOU DO NOT NEED TO HAVE ANY INJURY TO RECEIVE A CUPPING THERAPY TREATMENT.

Cups may be placed almost anywhere on the body.

CUPPING MESSAGE LIKE NO OTHER

RELAXING TREATMENT + **PAIN FREE**

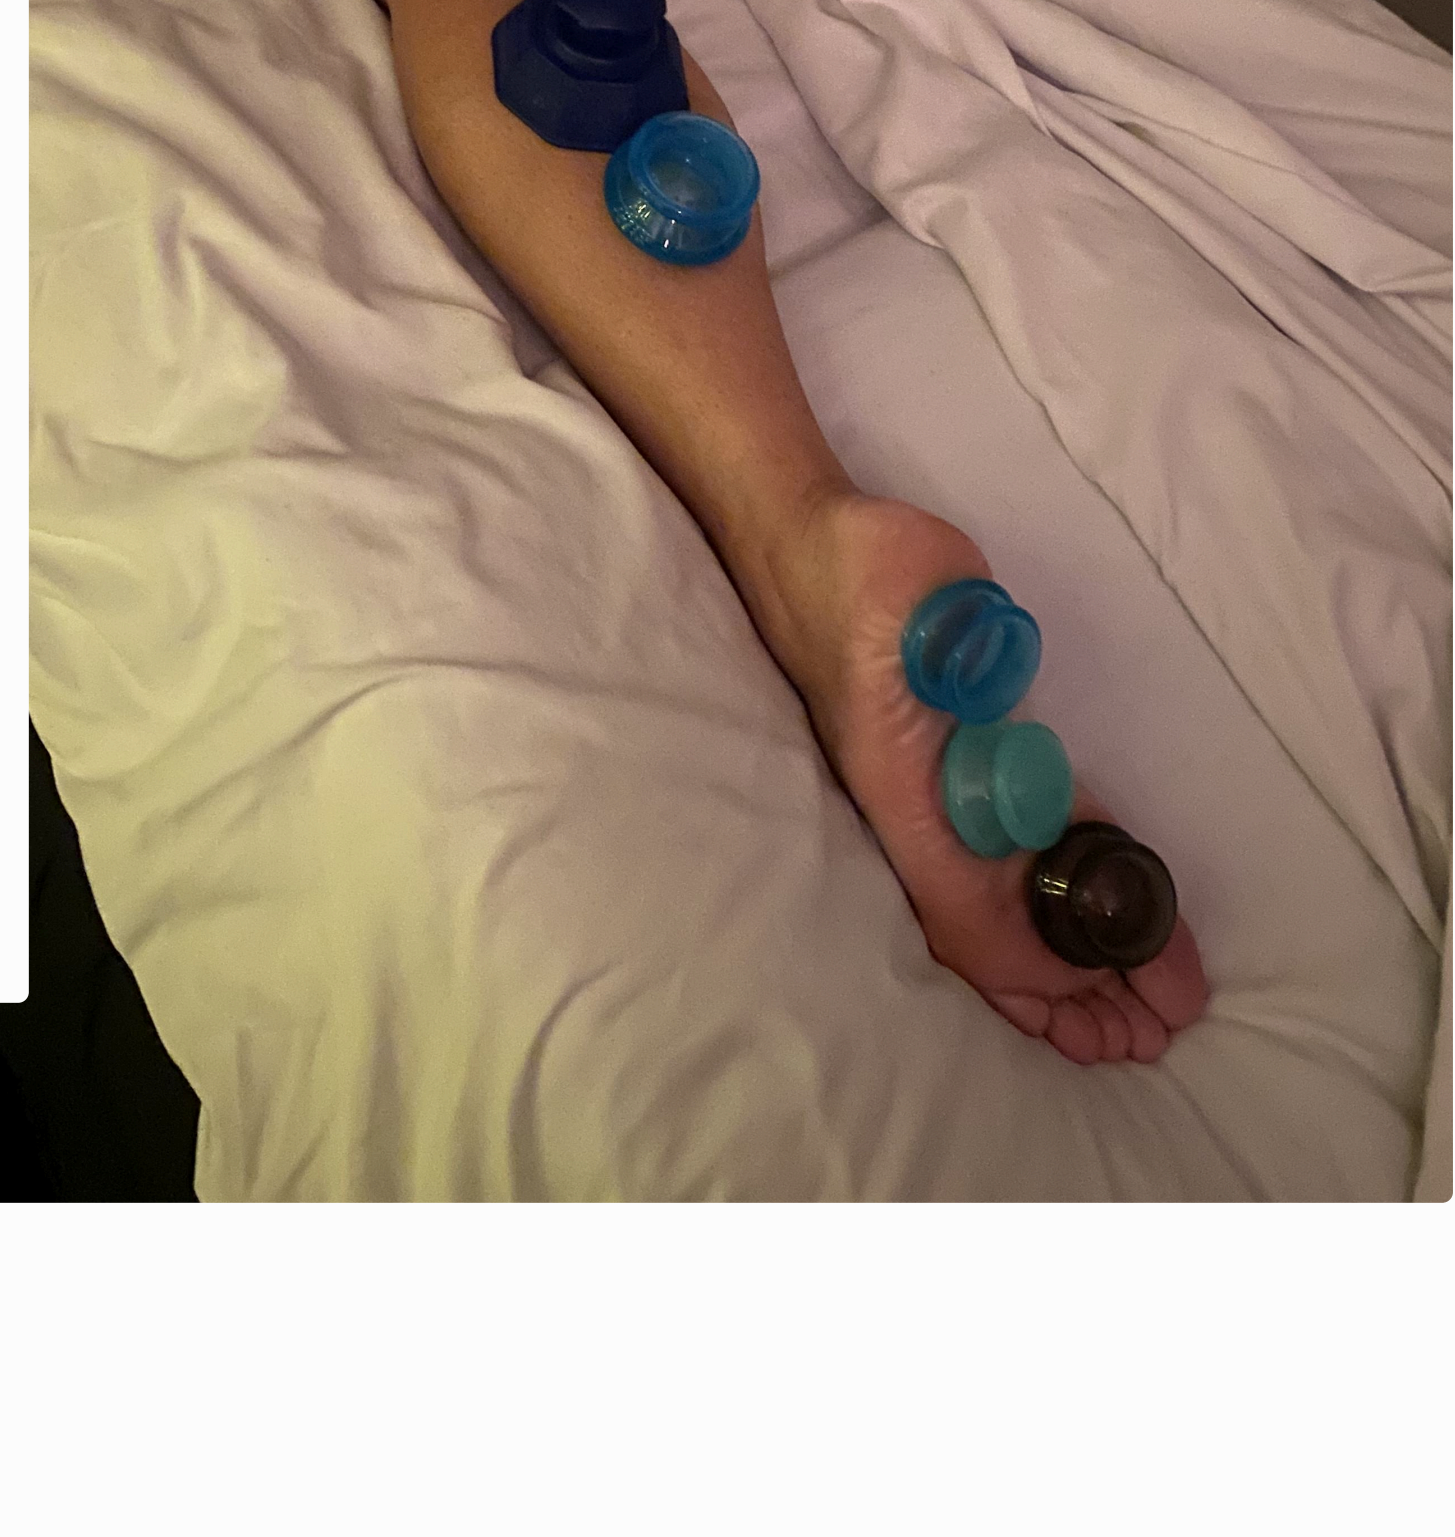

For this treatment, I first massage the problem area(s), then glide cups over it, leaving them in place for up to 20 minutes.

While waiting, I attend to other body parts.

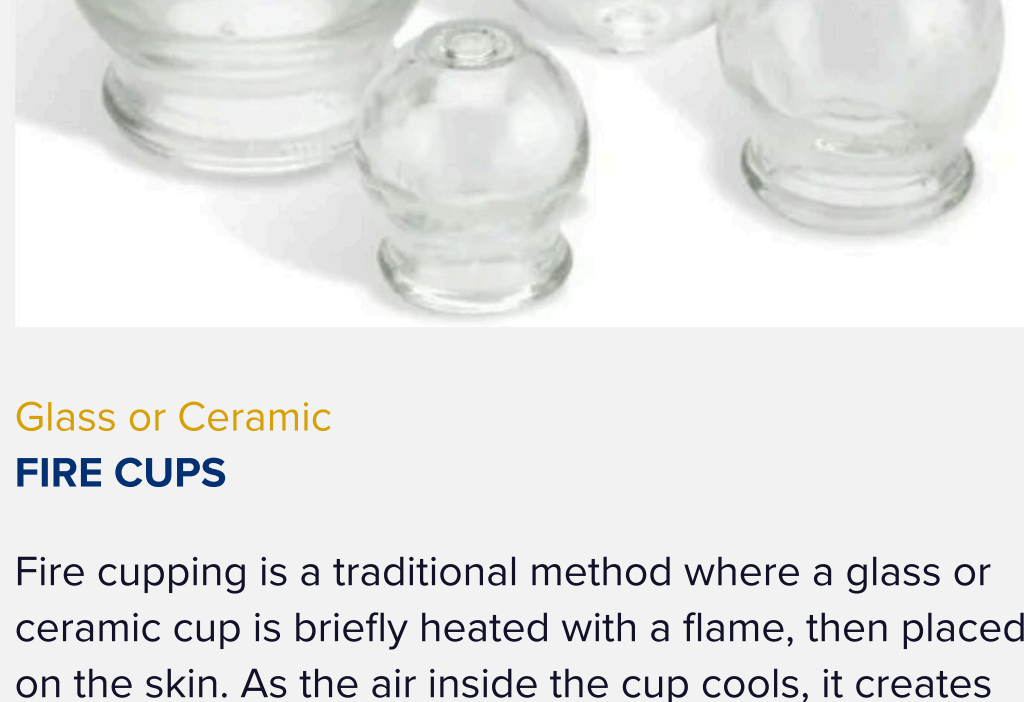

Afterwards, I revisit the original cups—if the marks are dark, I focus there before completing the rest of the session.

Static cupping (leaving cups in one place) can cause marks or discoloration.

Don't want marks? I'll keep the cups moving instead.

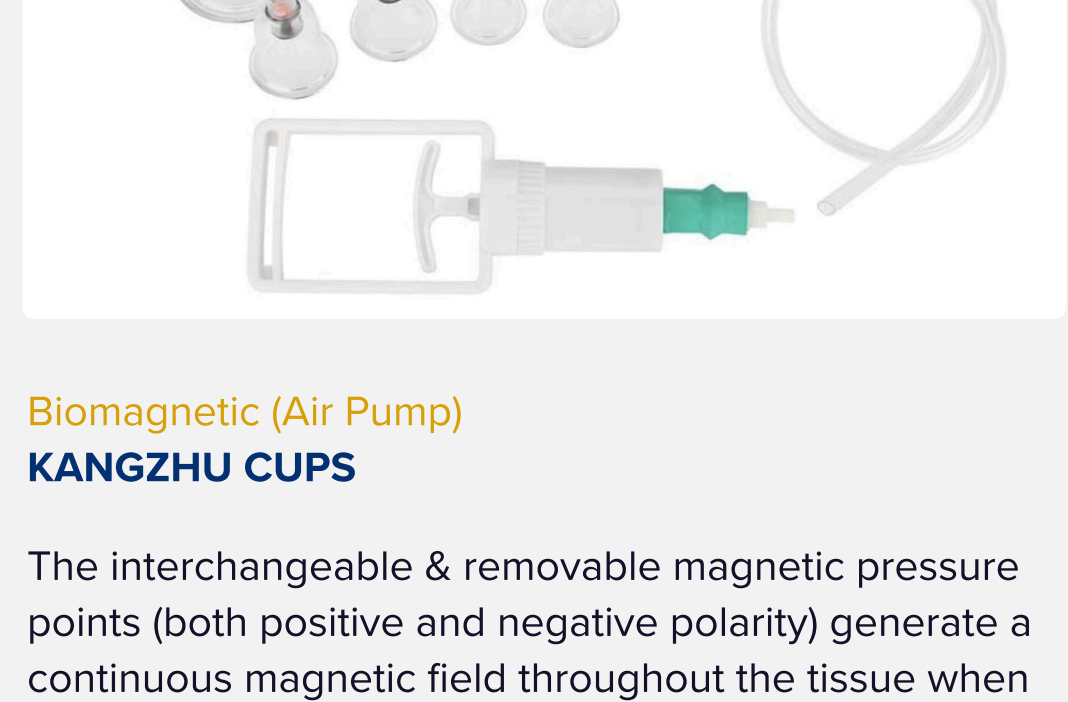

EACH CUP HAS A PURPOSE IN LIFE

BUT WITH THE **SAME** OVERALL **BENEFITS**Glass or Ceramic **FIRE CUPS**

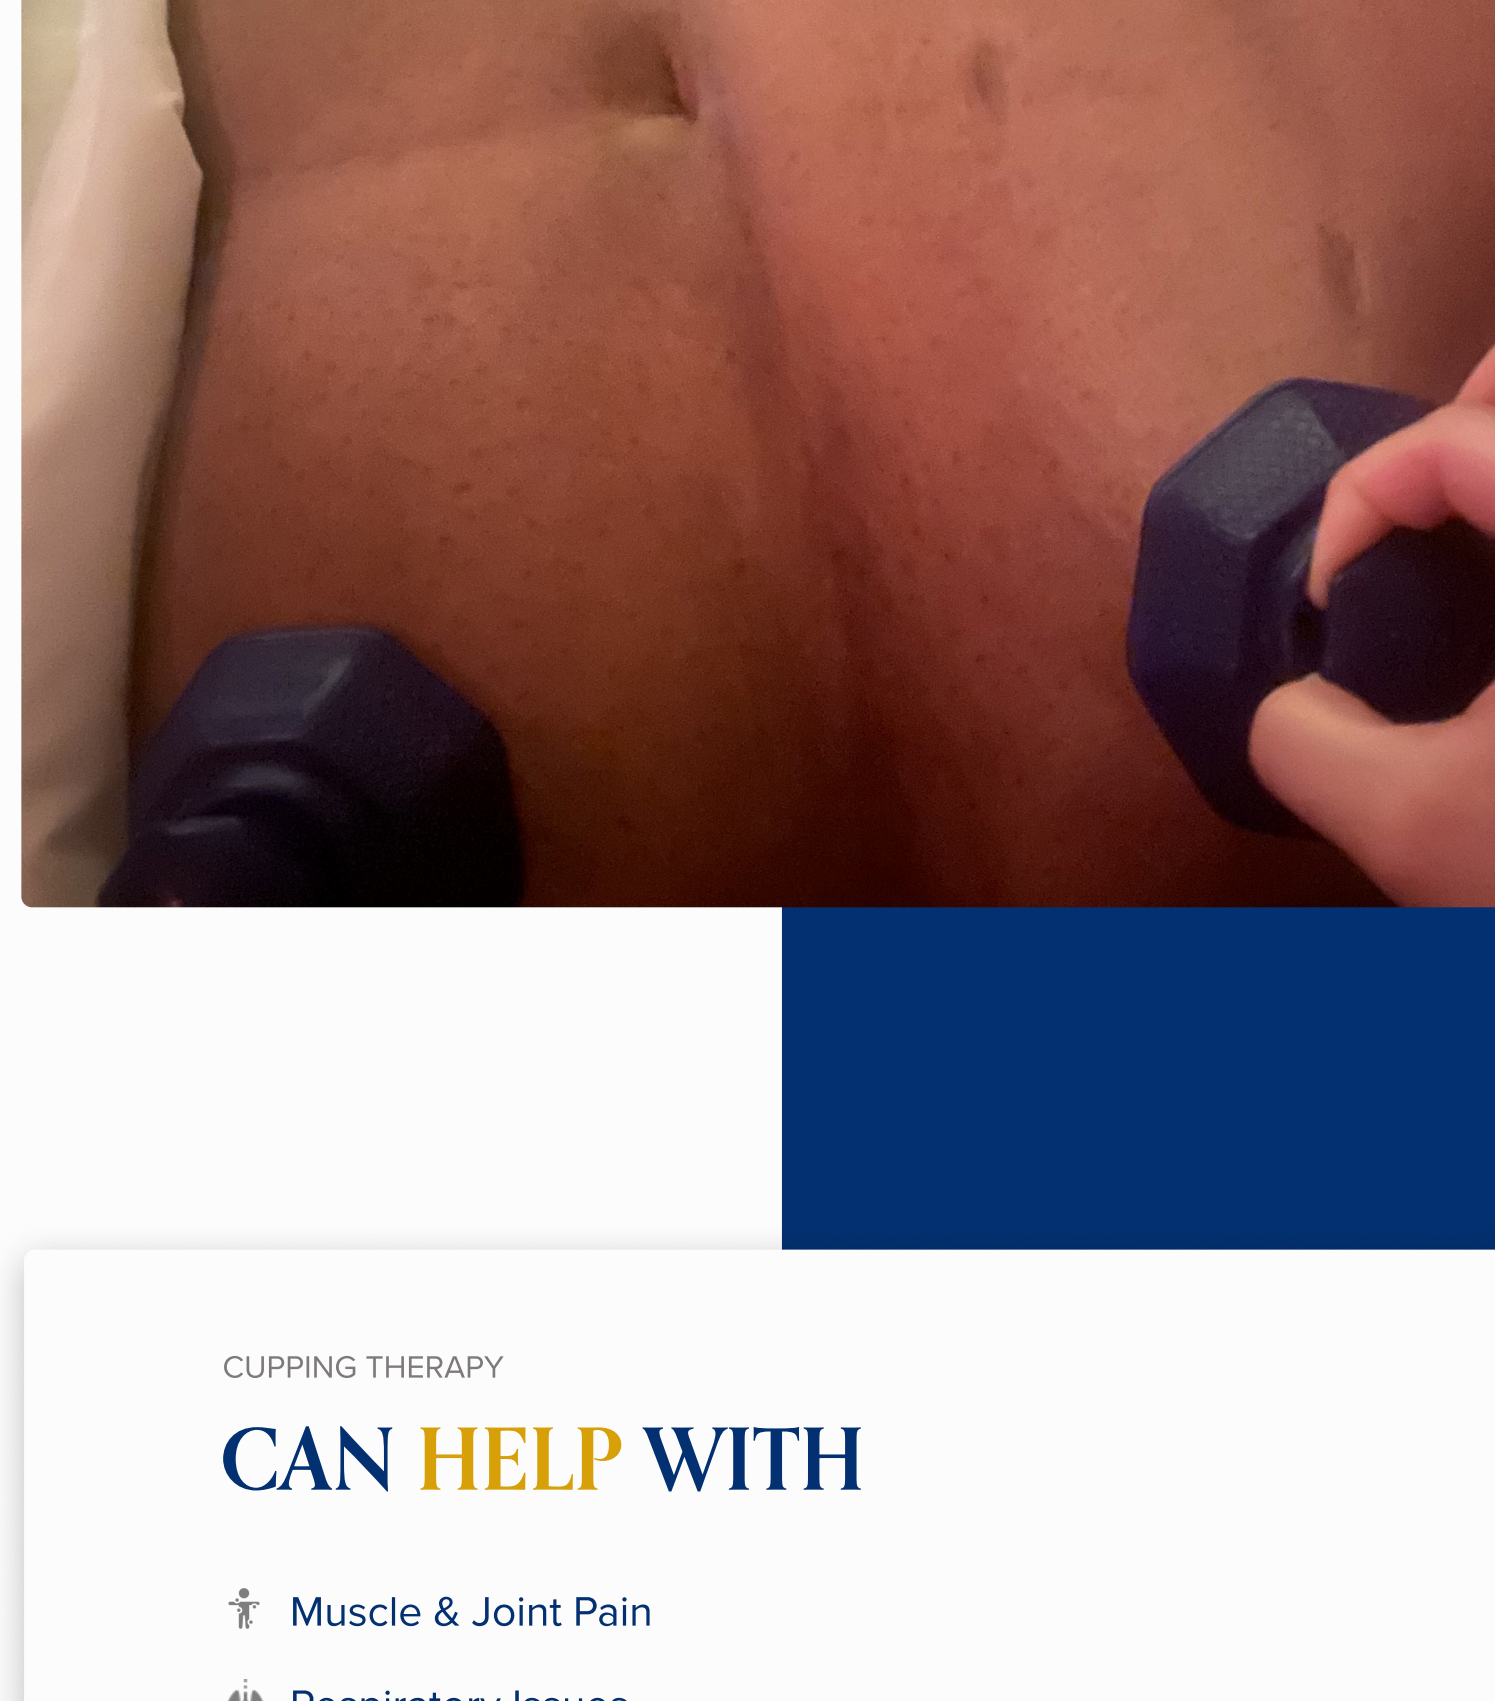

Fire cupping is a traditional method where a glass or ceramic cup is briefly heated with a flame, then placed on the skin. As the air inside the cup cools, it creates suction that draws the skin and underlying tissue upward.

The cups are not hot. The warmth of the cup's edge adds a soothing sensation, making the experience more relaxing than standard suction cups, especially when gliding.

Biomagnetic (Air Pump) **KANGZHU CUPS**

The interchangeable & removable magnetic pressure points (both positive and negative polarity) generate a continuous magnetic field throughout the tissue when installed. These magnets do not penetrate the skin but provide non-invasive pressure on its surface. Their purpose is to deliver balanced magnetic exposure.

Ideal to support better sleep, ease sciatica discomfort, reduce numbness or tingling, and help soften scar tissue

CUPPING MARKS ARE **NOT BRUISES!**

Cupping mark can last a few days to a couple weeks.

With regular cupping, the marks get lighter and disappear faster each time.

Cupping marks are your body's way of saying it dragged out all the old gunk (stagnant blood, lymph, waste) from deep down, stirred up the circulation, and is now doing the cleanup work.

FACIAL CUPS

SPECIFICALLY MADE FOR THE FACE

These cups are specifically made for the face, with minimal, but effective suction. Because these cups are constantly moving, the intention is to not leave marks or discolorations on the skin.

FACIAL CUPPING

CAN **HELP WITH**
